

JLG 32E

SKU: N/A | **Categories:** [Other](#), [Rental Products](#) |

PRODUCT DESCRIPTION

The JLG 32E is a [toucan mast boom lift](#) that sports an impressive maximum height for its relatively compact frame. The fully vertical mast allows it to keep its respectable 32 ft 3 in working height while keeping only a 3 ft 9 in chassis. Consequently, this machine is well equipped to maneuver around obstacles and still be able to reach great heights with ease.

Applications

The JLG 32E is well-equipped for work at high elevations and maneuvering around obstacles. Its frame, while not quite as small as some others available, still works wonders at getting through tight spaces. Additionally, this very slight increase in size allows for a noticeably higher platform height. Consequently, this machine has comparable maneuverability to others on the market, and also more reach without much sacrifice. It is a great option for work in warehouses and crowded lots.
